CRISPR has quickly captivated major scientific journals and the popular press for sparking a revolution in genetic engineering. While the ultimate prize is to eradicate diseases, the technology is already shaping how potential medicines for cancer and other conditions are discovered. NIBR has adopted CRISPR to research potential gene therapies and to identify drug targets.

Novartis researchers in Cambridge and Basel, Switzerland use CRISPR to quickly and precisely investigate thousands of genes related to cancer as potential drug targets. As performed, the effort would have been impossible without the genetic engineering technology. This allows these groups to ask and answer the question, "Is this gene required for the survival of this cancer?"

With honorary co-chairs Senator Shelley Moore Capito (R-WV), Senator Maggie Hassan (D-NH), Congresswoman Martha Roby (AL-02) and Congresswoman Debbie Wasserman Schultz (FL-23), GlobalWIN provides a dynamic forum for women executives and thought leaders in academia, government, and business who are passionate about innovation and its potential to advance critical policy issues. GlobalWIN is dedicated to helping women in these fields and related policy debates by providing opportunities to: 1) recognize their contributions to innovation and related policy debates; 2) share their views & engage publicly; 3) access resources that might not otherwise be readily available to accomplish these objectives; 4) broaden their network across areas of expertise and beyond our borders.
